Flight Crew Aircraft Type List

Personnel Licensing

Introduction:

The following list is divided into the various groups that detail the training and/or examination requirements for Aircrew Licence Issue. It should be noted that a type rating is designated by an "Airframe/Engine" combination rather than simply an "Airframe" type which more clearly defines the variants appropriate to the rating stated on the licence. Note that all aircraft defined as type variants of the specific type rating, are included in the type rating that is endorsed on the licence.

Group 1

Those aircraft that require Approved Type Training and Examination for licence endorsement. (Note that a licence extended with a type rating does NOT entitle the holder to fly an aircraft for Commercial Air Transport until the appropriate authorisation is issued by the Approved Air Operator.)

Group 2

Those aircraft that require Approved Type Examination and satisfactory evidence of the required experience for endorsement of a licence. (Approved type training may be accepted in lieu of the above requirement.) The aircraft listed in this Group may be added to the licence as a "group" rating (such as Single Engine PWC PT6 powered Turbo Propeller Aeroplane) once the necessary individual type rating requirements have been met. (Note that a licence extended with a type or group rating does NOT entitle the holder to fly an aircraft for Commercial Air Transport until the appropriate authorisation is issued by the Approved Air Operator.)

Group 3

Those aircraft that require Approved Type Examination and satisfactory evidence of the required experience. (Approved type training may be accepted in lieu of the above requirement.) The aircraft listed in this Group may be added to the licence as a Class rating once the necessary demonstration of experience on at least three types has been met. These Class ratings may be subject to the following limitations where experience cannot be demonstrated.

- 1) Pressurised aeroplanes
- 2) Aeroplanes with retractable undercarriage
- 3) Aeroplanes variable pitch propellers
- 4) Aeroplanes with variable flaps, slats, or other lift augmentation devices

(Note that a licence extended with a type or group rating does NOT entitle the holder to fly an aircraft for Commercial Air Transport)
