**SUBPART C — PRIVATE PILOT LICENCE (PPL)**

**AMC1 FCL.210; FCL.215**

**SYLLABUS OF THEORETICAL KNOWLEDGE FOR THE PPL (A) AND PPL (H)**

The following tables contain the syllabi for the courses of theoretical knowledge, as well as for the theoretical knowledge examinations for the PPL (A) and PPL (H). The training and examination should cover aspects related to non-technical skills in an integrated manner, taking into account the particular risks associated to the licence and the activity. An approved course shall comprise at least 100 hours of theoretical knowledge instruction. This theoretical knowledge instruction provided by the ATO should include a certain element of formal classroom work but may include also such facilities as interactive video, slide or tape presentation, computer-based training and other media distance learning courses. The training organisation responsible for the training has to check if all the appropriate elements of the training course of theoretical knowledge instruction have been completed to a satisfactory standard before recommending the applicant for the examination.

The applicable items for each licence are marked with 'x'. An 'x' on the main title of a subject means that all the sub-divisions are applicable.

		PPL	Bridge course	PPL	Bridge course
	Hearing: (a) descriptive and functional anatomy; (b) flight related hazards to hearing; (c) hearing loss.	x		x	
	Equilibrium: (a) functional anatomy; (b) motion and acceleration; (c) motion sickness.	x		x	
	Integration of sensory inputs: (a) spatial disorientation: forms, recognition and avoidance;	x		x	
	(b) illusions: forms, recognition and avoidance: (1) physical origin; (2) physiological origin; (3) psychological origin. (c) approach and landing problems.				
	<b>Health and hygiene</b>				
	Personal hygiene: personal fitness	x		x	
	Body rhythm and sleep: (a) rhythm disturbances; (b) symptoms, effects and management.	x		x	
	Problem areas for pilots: (a) common minor ailments including cold, influenza and gastro-intestinal upset; (b) entrapped gases and barotrauma, (scuba diving); (c) obesity; (d) food hygiene; (e) infectious diseases; (f) nutrition; (g) various toxic gases and materials.	x		x	
	Intoxication:	x		x	
	(a) prescribed medication; (b) tobacco; (c) alcohol and drugs;				

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
(d) caffeine; (e) self-medication.				
<b>Basic aviation psychology</b>				
<b>Human information processing</b>				
Attention and vigilance: (a) selectivity of attention; (b) divided attention.	x		x	
Perception: a) perceptual illusions; b) subjectivity of perception; c) processes of perception.	x		x	
Memory: (a) sensory memory; (b) working or short term memory; (c) long term memory to include motor memory (skills).	x		x	
<b>Human error and reliability</b>				
Reliability of human behaviour	x		x	
Error generation: social environment (group, organisation)	x		x	
<b>Decision making</b>				
Decision-making concepts: (a) structure (phases); (b) limits; (c) risk assessment; (d) practical application.	x		x	
<b>Avoiding and managing errors: cockpit management</b>				
Safety awareness: (a) risk area awareness; (b) situational awareness.	x		x	
Communication: verbal and non-verbal communication	x		x	
<b>Human behaviour</b>				
Personality and attitudes: (a) development;	x		x	

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	(b) environmental influences.				
	Identification of hazardous attitudes (error proneness)	x		x	
	<b>Human overload and underload</b>				
	Arousal	x		x	
	Stress: (a) definition(s); (b) anxiety and stress; (c) effects of stress.	x		x	
	Fatigue and stress management: (a) types, causes and symptoms of fatigue; (b) effects of fatigue; (c) coping strategies; (d) management techniques; (e) health and fitness programmes;	x		x

<b>3.</b>	<b>METEOROLOGY</b>				
	<b>The atmosphere</b>				
	<b>Composition, extent and vertical division</b>				
	Structure of the atmosphere	x		x	
	Troposphere	x		x	
	<b>Air temperature</b>				
	Definition and units	x		x	
	Vertical distribution of	x		x	
	temperature Transfer of heat	x		x	
	Lapse rates, stability and instability	x		x	
	Development of inversions and types of inversions	x		x	
	Temperature near the earth's surface, surface effects, diurnal and seasonal variation, effect of clouds and effect of wind	x		x	
	<b>Atmospheric pressure</b>				
	Barometric pressure and isobars	x		x	

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	Pressure variation with height	x		x	
	Reduction of pressure to mean sea level	x		x	
	Relationship between surface pressure centres and pressure centres aloft	x		x	
	<b>Air density</b>				
	Relationship between pressure, temperature and density	x		x	
	ISA				
	<b>ICAO standard atmosphere</b>	x		x	
	<b>Altimetry</b>				
	Terminology and definitions	x		x	
	Altimeter and altimeter settings	x		x	
	Calculations	x		x	
	Effect of accelerated airflow due to topography	x		x	
	<b>Wind</b>				
	<b>Definition and measurement of wind</b>				
	Definition and measurement	x		x	
	<b>Primary cause of wind</b>				
	Primary cause of wind, pressure gradient, coriolis force and gradient wind	x		x	
	Variation of wind in the friction layer	x		x	
	Effects of convergence and divergence	x		x	
	<b>General global circulation</b>				
	General circulation around the globe	<b>X</b>		<b>X</b>	
	<b>Local winds</b>				
	Anabatic and katabatic winds, mountain and valley winds, Venturi effects, land and sea breezes	<b>X</b>		<b>X</b>	
	<b>Mountain waves (standing waves, lee waves)</b>				
	Origin and characteristics	<b>X</b>		<b>X</b>	
	<b>Turbulence</b>				
	Description and types of turbulence	<b>X</b>		<b>X</b>	
	Formation and location of turbulence	<b>X</b>		<b>X</b>	

	<b>THERMODYNAMICS</b>				
	<b>Humidity</b>				
	Water vapour in the atmosphere	X		X	
	Mixing ratio	X		X	
	Temperature/dew point, relative humidity	X		X	
	<b>Change of state of aggregation</b>				
	Condensation, evaporation, sublimation, freezing and melting, latent heat	X		X	
	<b>Adiabatic processes</b>				
	Adiabatic processes, stability of the atmosphere	X		X	
	<b>CLOUDS AND FOG</b>				
	<b>Cloud formation and description</b>				
	Cooling by adiabatic expansion and by advection	X		X	
	Cloud types and cloud classification	X		X	
	Influence of inversions on cloud development	X		X	
	<b>Fog, mist, haze</b>				
	General aspects	X		X	
	Radiation fog	X		X	
	Advection fog	X		X	
	Steaming fog	X		X	
	Frontal fog	X		X	
	Orographic fog (hill fog)	X		X	
	<b>PRECIPITATION</b>				
	<b>Development of precipitation</b>				
	Processes of development of precipitation	X		X	
	<b>Types of precipitation</b>				
	Types of precipitation, relationship with cloud types	X		X	
	<b>AIR MASSES AND FRONTS</b>				
	<b>Air masses</b>				
	Description, classification and source regions of air masses	X		X	
	Modifications of air masses	X		X	
	<b>Fronts</b>				
	General aspects	X		X	
	Warm front, associated clouds and weather	X		X	
	Cold front, associated clouds and weather	X		X	

Warm sector, associated clouds and weather	X		X	
Weather behind the cold front	X		X	
Occlusions, associated clouds and weather	X		X	
Stationary front, associated clouds and weather	X		X	
Movement of fronts and pressure systems, life cycle	X		X	
Changes of meteorological elements at a frontal wave	X		X	
<b>PRESSURE SYSTEMS</b>				
<b>Anticyclone</b>				
Anticyclones, types, general properties, cold and warm anticyclones, ridges and wedges, subsidence	X		X	
<b>Non frontal depressions</b>				
Thermal-, orographic-, polar depressions, troughs	X		X	
<b>CLIMATOLOGY</b>				
<b>Climatic zones</b>				
General seasonal circulation in the troposphere	X		X	
<b>Typical weather situations in the mid-latitudes</b>				
Westerly situation	X		X	
High pressure area	X		X	
Flat pressure pattern	X		X	
<b>Local winds and associated weather</b>				
e.g. Foehn	X		X	
<b>FLIGHT HAZARDS</b>				
<b>Icing</b>				
Conditions for ice accretion	X		X	
Types of ice accretion	X		X	
Hazards of ice accretion, avoidance	X		X	
<b>Turbulence</b>				
Effects on flight, avoidance	X		X	
<b>Wind shear</b>				
Definition of wind shear	X		X	
Weather conditions for wind shear	X		X	
Effects on flight, avoidance	X		X	
<b>Thunderstorms</b>				

Conditions for and process of development, forecast, location, type specification	X		X	
Structure of thunderstorms, life history, squall lines, electricity in the atmosphere, static charges	X		X	
Electrical discharges	X		X	
Development and effects of downbursts	X		X	
Thunderstorm avoidance	X		X	
<b>Inversions</b>				
Influence on aircraft performance	X		X	
<b>Hazards in mountainous areas</b>				
Influence of terrain on clouds and precipitation, frontal passage	X		X	
Vertical movements, mountain waves, wind shear, turbulence, ice accretion	X		X	
Development and effect of valley inversions	X		X	
<b>Visibility reducing phenomena</b>				
Reduction of visibility caused by precipitation and obscuration	X		X	
Reduction of visibility caused by other phenomena	X		X	
<b>METEOROLOGICAL INFORMATION</b>				
<b>Observation</b>				
Surface observations	X		X	
Radiosonde observations	X		X	
Satellite observations	X		X	
Weather radar observations	X		X	
Aircraft observations and reporting	X		X	
<b>Weather charts</b>				
Significant weather charts	X		X	
Surface charts	X		X	
<b>Information for flight planning</b>				
Aviation weather messages	X		X	
Meteorological broadcasts for aviation	X		X	
Use of meteorological documents	X		X	
Meteorological warnings	X		X

<b>5.</b>	<b>PRINCIPLES OF FLIGHT</b>				
<b>5.1.</b>	<b>PRINCIPLES OF FLIGHT: AEROPLANE</b>				
	<b>Subsonic aerodynamics</b>				
	<b>Basics concepts, laws and definitions</b>				
	Laws and definitions:	x	x		

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
(a) conversion of units; (b) Newton's laws; (c) Bernoulli's equation and venturi; (d) static pressure, dynamic pressure and total pressure; (e) density; (f) IAS and TAS.				
Basics about airflow: (a) streamline; (b) two-dimensional airflow; (c) three-dimensional airflow.	x	x		
Aerodynamic forces on surfaces: (a) resulting airforce; (b) lift; (c) drag; (d) angle of attack.	x	x		
Shape of an aerofoil section: (a) thickness to chord ratio; (b) chord line; (c) camber line; (d) camber; (e) angle of attack.	x	x		
The wing shape: (a) aspect ratio; (b) root chord; (c) tip chord; (d) tapered wings; (e) wing planform.	x	x		
<b>The two-dimensional airflow about an aerofoil</b>				
Streamline pattern	x	x		
Stagnation point	x	x		
Pressure distribution	x	x		
Centre of pressure	x	x		
Influence of angle of attack	x	x		
Flow separation at high angles of attack	x	x		

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
The lift – $C_L$ graph	x	x		
<b>The coefficients</b>				
The lift coefficient $C_L$ : the lift formula	x	x		
The drag coefficient $C_d$ : the drag formula	x	x		
<b>The three-dimensional airflow round a wing and a fuselage</b>				
Streamline pattern: (a) span-wise flow and causes; (b) tip vortices and angle of attack; (c) upwash and downwash due to tip vortices; (d) wake turbulence behind an aeroplane (causes, distribution and duration of the phenomenon).	x	x		
Induced drag: (a) influence of tip vortices on the angle of attack; (b) the induced local $C_L$ ; (c) influence of induced angle of attack on the direction of the lift vector; (d) induced drag and angle of attack.	x	x		
<b>Drag</b>				
The parasite drag: (a) pressure drag; (b) interference drag; (c) friction drag.	x	x		
The parasite drag and speed	x	x		
The induced drag and speed	x	x		
The total drag	x	x		
<b>The ground effect</b>				
Effect on take off and landing characteristics of an aeroplane	x	x		
<b>The stall</b>				
Flow separation at increasing angles of attack: (a) the boundary layer: (1) laminar layer;	x	x		

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	(2) turbulent layer; (3) transition. (b) separation point; (c) influence of angle of attack; (d) influence on: (1) pressure distribution; (2) location of centre of pressure; (3) CL; (4) CD; (5) pitch moments. (e) buffet; (f) use of controls.				
	The stall speed: (a) in the lift formula; (b) 1g stall speed; (c) influence of: (1) the centre of gravity; (2) power setting; (3) altitude (IAS); (4) wing loading; (5) load factor n: (i) definition; (ii) turns; (iii) forces.	x	x		
	The initial stall in span-wise direction: (a) influence of planform; (b) geometric twist (wash out); (c) use of ailerons.	x	x		

	Stall warning: (a) importance of stall warning; (b) speed margin; (c) buffet; (d) stall strip; (e) flapper switch; (f) recovery from stall.	x	x		
--	---	---	---	--	--

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
Special phenomena of stall: (a) the power-on stall; (b) climbing and descending turns; (c) t-tailed aeroplane; (d) avoidance of spins: (1) spin development; (2) spin recognition; (3) spin recovery. (e) ice (in stagnation point and on surface): (1) absence of stall warning; (2) abnormal behaviour of the aircraft during stall.	x	x		
<b>CL augmentation</b>				
Trailing edge flaps and the reasons for use in take-off and landing: (a) influence on CL - $\alpha$ -graph; (b) different types of flaps; (c) flap asymmetry; (d) influence on pitch movement.	x	x		
Leading edge devices and the reasons for use in take-off and landing	x	x		
<b>The boundary layer</b>				
Different types: (a) laminar; (b) turbulent.	x	x		
<b>Special circumstances</b>				
Ice and other contamination: (a) ice in stagnation point; (b) ice on the surface (frost, snow and clear ice); (c) rain; (d) contamination of the leading edge; (e) effects on stall; (f) effects on loss of controllability; (g) effects on control surface moment; (h) influence on high lift devices during take-	x	x		

	off, landing and low speeds.

(d) TAS and IAS; (e) two-dimensional airflow and three-dimensional airflow; (f) viscosity and boundary layer.				
Two-dimensional airflow			X	X
Aerofoil section geometry: (a) aerofoil section; (b) chord line, thickness and thickness to chord ratio of a section; (c) camber line and camber; (d) symmetrical and asymmetrical aerofoils sections.			X	X
Aerodynamic forces on aerofoil elements: (a) angle of attack; (b) pressure distribution; (c) lift and lift coefficient (d) relation lift coefficient: angle of attack; (e) profile drag and drag coefficient; (f) relation drag coefficient: angle of attack; (g) resulting force, centre of pressure and pitching moment.			X	X
Stall: (a) boundary layer and reasons for stalling; (b) variation of lift and drag as a function of angle of attack; (c) displacement of the centre of pressure and pitching moment.			X	X
Disturbances due to profile contamination: (a) ice contamination; (b) ice on the surface (frost, snow and clear ice).			X	X
The three-dimensional airflow round a wing and a fuselage			X	X
The wing:			X	X
(a) planform, rectangular and tapered wings;				
(b) wing twist.				
Airflow pattern and influence on lift:			X	X

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	(a) span wise flow on upper and lower surface; (b) tip vortices; (c) span-wise lift distribution.				
	Induced drag: causes and vortices			x	x
	The airflow round a fuselage: (a) components of a fuselage; (b) parasite drag; (c) variation with speed.			x	x
	<b>Transonic aerodynamics and compressibility effects</b>				
	Airflow velocities			x	x
	Airflow speeds: (a) speed of sound; (b) subsonic, high subsonic and supersonic flows.			x	x
	Shock waves: (a) compressibility and shock waves; (b) the reasons for their formation at upstream high subsonic airflow; (c) their effect on lift and drag.			x	x
	Influence of wing planform: sweep-angle			x	x
	<b>Rotorcraft types</b>			x	x
	Rotorcraft			x	x
	Rotorcraft types: (a) autogyro; (b) helicopter.			x	x
	Helicopters			x	x
	Helicopters configurations: the single main rotor helicopter			x	x
	The helicopter, characteristics and associated terminology: (a) general lay-out, fuselage, engine and gearbox; (b) tail rotor, fenestron and NOTAR;			x	x
	(c) engines (reciprocating and turbo shaft engines); (d) power transmission;				

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	(e) rotor shaft axis, rotor hub and rotor blades; (f) rotor disc and rotor disc area; (g) teetering rotor (two blades) and rotors with more than two blades;				
	(h) skids and wheels; (i) helicopter axes and fuselage centre line;				
	(j) roll axis, pitch axis and normal or yaw axis; (k) gross mass, gross weight and disc loading.				
	<b>Main rotor aerodynamics</b>			x	x
	Hover flight outside ground effect			x	x
	Airflow through the rotor discs and round the blades: (a) circumferential velocity of the blade sections; (b) induced airflow, through the disc and downstream; (c) downward fuselage drag; (d) equilibrium of rotor thrust, weight and fuselage drag; (e) rotor disc induced power; (f) relative airflow to the blade; (g) pitch angle and angle of attack of a blade section; (h) lift and profile drag on the blade element; (i) resulting lift and thrust on the blade and rotor thrust; (j) collective pitch angle changes and necessity of blade feathering; (k) required total main rotor-torque and rotor-power; (l) influence of the air density.			x	x

	Anti-torque force and tail rotor: (a) force of tail rotor as a function of main rotor-torque; (b) anti-torque rotor power; (c) necessity of blade feathering of tail rotor blades and yaw pedals.			x	x
--	--	--	--	---	---

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	Maximum hover altitude OGE: (a) total power required and power available; (b) maximum hover altitude as a function of pressure altitude and OAT.			x	x
	Vertical climb			x	x
	Relative airflow and angles of attack:			x	x
	(a) climb velocity VC, induced and relative velocity and angle of attack; (b) collective pitch angle and blade feathering.				
	Power and vertical speed: (a) induced power, climb power and profile power;			x	x
	(b) total main rotor power and main rotor torque;				
	(c) tail rotor power;				
	(d) total power requirement in vertical flight.				
	Forward flight			x	x
	Airflow and forces in uniform inflow distribution: (a) assumption of uniform inflow distribution on rotor disc; (b) advancing blade (90°) and retreating blade (270°); (c) airflow velocity relative to the blade sections, area of reverse flow; (d) lift on the advancing and retreating blades at constant pitch angles; (e) necessity of cyclic pitch changes; (f) compressibility effects on the advancing blade tip and speed limitations; (g) high angle of attack on the retreating blade, blade stall and speed limitations; (h) thrust on rotor disc and tilt of thrust vector; (i) vertical component of the thrust vector and gross weight equilibrium;			x	x

	(j) horizontal component of the thrust vector and drag equilibrium.				
	The flare (power flight):			x	x

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	(a) thrust reversal and increase in rotor thrust; (b) increase of rotor RPM on non governed rotor.				
	Power and maximum speed: (a) induced power as a function of helicopter speed; (b) rotor profile power as a function of helicopter speed; (c) fuselage drag and parasite power as a function of forward speed; (d) tail rotor power and power ancillary equipment; (e) total power requirement as a function of forward speed; (f) influence of helicopter mass, air density and drag of additional external equipment;			x	x
	(g) translational lift and influence on power required.				
	Hover and forward flight in ground effect			x	x
	Airflow in ground effect and downwash: rotor power decrease as a function of rotor height above the ground at constant helicopter mass			x	x
	Vertical descent			x	x
	Vertical descent, power on:			x	x
	(a) airflow through the rotor, low and moderate descent speeds; (b) vortex ring state, settling with power and consequences.				
	Autorotation: (a) collective lever position after failure; (b) up flow through the rotor, auto-rotation and anti-autorotation rings; (c) tail rotor thrust and yaw control; (d) control of rotor RPM with collective lever; (e) landing after increase of rotor thrust by			x	x

	pulling collective and reduction in vertical speed.				
	Forward flight: Autorotation			x	x

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
Airflow through the rotor disc: (a) descent speed and up flow through the disc; (b) the flare, increase in rotor thrust, reduction of vertical speed and ground speed.			x	x
Flight and landing: (a) turning; (b) flare; (c) autorotative landing; (d) height or velocity avoidance graph and dead man's curve.			x	x
<b>Main rotor mechanics</b>			x	x
Flapping of the blade in hover			x	x
Forces and stresses on the blade: (a) centrifugal force on the blade and attachments; (b) limits of rotor RPM; (c) lift on the blade and bending stresses on a rigid attachment; (d) the flapping hinge of the articulated rotor and flapping hinge offset; (e) the flapping of the hinge less rotor and flexible element.			x	x
Coning angle in hover:			x	x
(a) lift and centrifugal force in hover and blade weight negligible (b) flapping, tip path plane and disc area.				
Flapping angles of the blade in forward flight			x	x
Forces on the blade in forward flight without cyclic feathering: (a) aerodynamic forces on the advancing and retreating blades without cyclic feathering;			x	x
(b) periodic forces and stresses, fatigue and flapping hinge; (c) phase lag between the force and the flapping angle (about 90°); (d) flapping motion of the hinged blades and tilting of the cone and flap back of				

	rotor;				
--	--------	--	--	--	--

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
(e) rotor disc attitude and thrust vector tilt.				
Cyclic pitch (feathering) in helicopter mode, forward flight: (a) necessity of forward rotor disc tilt and thrust vector tilt; (b) flapping and tip path plane, virtual rotation axis or no flapping axis and plane of rotation; (c) shaft axis and hub plane; (d) cyclic pitch change (feathering) and rotor thrust vector tilt; (e) collective pitch change, collective lever, swash plate, pitch link and pitch horn; (f) cyclic stick, rotating swash plate and pitch link movement and phase angle.			x	x
Blade lag motion			x	x
Forces on the blade in the disc plane (tip path plane) in forward flight: (a) forces due to the Coriolis effect because of the flapping; (b) alternating stresses and the need of the drag or lag hinge. The drag or lag hinge: (a) the drag hinge in the fully articulated rotor; (b) the lag flexure in the hinge less rotor; (c) drag dampers.			x  x	x  x
Ground resonance: (a) blade lag motion and movement of the centre of gravity of the blades and the rotor; (b) oscillating force on the fuselage; (c) fuselage, undercarriage and resonance.			x	x
Rotor systems			x	x
See-saw or teetering rotor			x	x

	Fully articulated rotor: (a) three hinges arrangement; (b) bearings and elastomeric hinges.			x	x
	Hinge less rotor and bearing less rotor			x	x

		Aeroplane		Helicopter	
		PPL	Bridge course	PPL	Bridge course
	Blade sailing: (a) low rotor RPM and effect of adverse wind; (b) minimising the danger;			x	x
	(c) droop stops.				
	Vibrations due to main rotor: (a) origins of the vibrations: in plane and vertical; (b) blade tracking and balancing.			x	x
	<b>Tail rotors</b>			x	x
	Conventional tail rotor			x	x
	Rotor description: (a) two-blades tail rotors with teetering hinge; (b) rotors with more than two blades; (c) feathering bearings and flapping hinges; (d) dangers to people and to the tail rotor, rotor height and safety.			x	x
	Aerodynamics: (a) induced airflow and tail rotor thrust; (b) thrust control by feathering, tail rotor drift and roll; (c) effect of tail rotor failure and vortex ring.			x	x
	The fenestron: technical lay-out			x	x
	The NOTAR: technical lay-out			x	x
	Vibrations: high frequency vibrations due to the tail rotors			x	x
	<b>Equilibrium, stability and control</b>			x	x
	Equilibrium and helicopter attitudes			x	x
	Hover: (a) forces and equilibrium conditions; (b) helicopter pitching moment and pitch angle; (c) helicopter rolling moment and roll angle.			x	x
	Forward flight: (a) forces and equilibrium conditions; (b) helicopter moments and angles;			x	x

	Aeroplane		Helicopter	
	PPL	Bridge course	PPL	Bridge course
(c) effect of speed on fuselage attitude.				
Control			x	x
Control power			x	x
(a) fully articulated rotor; (b) hinge less rotor; (c) teetering rotor.				
Static and dynamic roll over			x	x
<b>Helicopter performances</b>				
Engine performances			x	x
Piston engines:			x	x
(a) power available; (b) effects of density altitude.				
Turbine engines:			x	x
(a) power available; (b) effects of ambient pressure and temperature.				
Helicopter performances			x	x
Hover and vertical flight:			x	x
(a) power required and power available; (b) OGE and IGE maximum hover height; (c) influence of AUM, pressure, temperature and density.				
Forward flight:			x	x
(a) maximum speed; (b) maximum rate of climb speed; (c) maximum angle of climb speed; (d) range and endurance; (e) influence of AUM, pressure, temperature and density.				
Manoeuvring:			x	x
(a) load factor; (b) bank angle and number of g's; (c) manoeuvring limit load factor.				
Special conditions:			x	x
(a) operating with limited power; (b) over pitch and over torque.
